

NETCHEX

NETBENEFITS SOLUTION

BENEFITS ADMINISTRATION

Comprehensive doesn't have to mean complex. Netchex makes Benefits Administration easy, straightforward, and worry-free.

YOUR CHALLENGE

THE SOLUTION

We struggle to keep benefit deductions up-to-date and accurate in payroll because everything is so manual.

Automate benefit deductions in payroll, eliminating potential errors that can lead to profit leaks. This also prevents upsetting an employee because deductions were not taken out correctly.

Our employees often don't understand what our company contributes that makes up their whole salary package.

Let employees access a total compensation statement that educates them on everything your company provides over their base salary.

We know we have profit leaks because we miss deductions, but still wind up paying the carrier. We don't even know how much it's costing us!

Get reports that show you how much your invoice with the carrier should be and show you any employees that may not have worked enough hours to pay their full amount.

It takes me a lot of time and energy to keep up with who has finished their waiting period, distributing enrollment information, and ensuring they get their elections back to me.

Automate eligibility tracking and alert employees on your behalf when it's time to enroll. Utilize your dashboard to show outstanding enrollment tasks and deadlines for each employee.

Getting enrolled is only the beginning... then I have to figure out line of coverage codes and complete 1095s for my employees every year!

Automate the completion of 1095 and 1094 forms and filings by using the information Netchex already has for hire dates, hours worked, and enrollment choices.
