# Learning Management

Whether getting new hires up-to-speed, developing employees' skillsets, or updating company-wide compliance, the right Learning Management System (LMS) can make the process easier and more efficient. With NetLearn, companies can diminish skill gaps and develop your workforce with consistent online educational content delivered to your employees.

Diverse Content Libraries

NetLearn offers three distinct content libraries—HR Compliance, Professional Skills, and Workplace Safety—as well as the ability to import and create your own content. With 200+ high-quality, modern videos available in each collection, your company is ready-to-go on day one.

Customizable Curriculum

Align your training strategy to meet your business goals, increase engagement, and promote a culture of learning. Use your own training content or the pre-loaded material as you develop specific course tracks for individuals, departments, and company-wide. Preview courses before assigning, attach quizzes to ensure comprehension, and set pass/fail requirements.
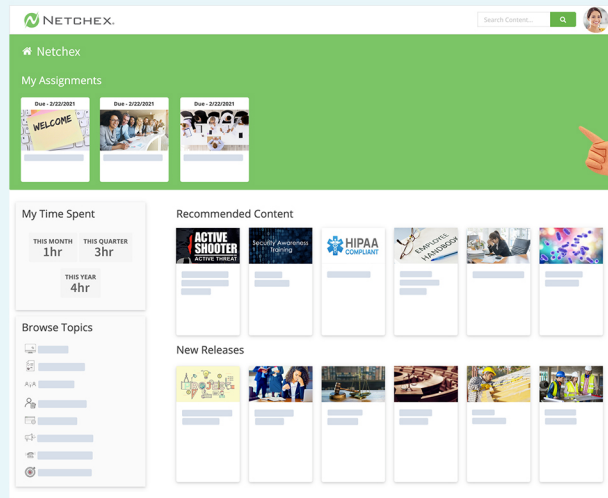

Employee-Friendly Navigation

The dashboard makes it easy for employees to see exactly what needs to be completed, view courses currently in-progress, and review recently completed courses, as well as time invested in training and course recommendations. Employees can also search for courses by topic as they work to grow their knowledge skillset on their own.

Easy Management & Reporting

From a customizable dashboard, administrators get an overview of all past and current activity, assignments, and scores, as well as upcoming requirements. Streamline your process with automated course assignments, emails, and alerts. Take a deeper dive into KPIs and important metrics with in-depth reporting to gain insight into a specific employee, team, or company activity.

Available Libraries of Learning

3 Different Course Libraries to Choose From - all 3 include 200 courses.

Comes with the ability to build or upload your own courses.

HR Compliance

This package helps ensure that leaders and front line employees understand what's expected of them as well as things they should / should not do in the workplace that can expose your business to liability. Courses include things like anti-harassment, hiring and recruiting, HIPAA, diversity and respect, and more.

Professional Development

This package is a great way to invest in your workforce. Strengthen the skillsets of the employees you already have and use this as a recruiting tool to let prospective employees know that working for your company is more than a job. Courses include things like time management and productivty, career development, communicatoin, accounting, etiquette, and more.

Workplace Safety

There is an injury risk whether working with power tools, heavy machinery, or office equipment. This package is a great way to educate your team on best practices to prevent injuries at work. Courses include things like OSHA, accient prevention, emergency planning, office safety, safe driving, hazard communication, and more.
