

NETCHEX

NETSCHEDULER SOLUTION

SCHEDULE MANAGEMENT

Make employee scheduling work with your schedule, not the other way around. NetScheduler enables you to build smarter work schedules and enhance the employee experience.

YOUR CHALLENGE

THE SOLUTION

Do I have the coverage I need this week? It's hard to juggle so many schedules!

Build all kinds of schedules, including repeating schedules, to make sure you have the right number of people at different times of the day.

Do I have qualified team members on my shifts?

Build qualifications based on licenses, certifications, position, department, etc. to make sure you always have the right people scheduled for the right job.

I spend so much time communicating schedules to employees!

With online access, a mobile app, and email and text alerts, you can keep everyone on the same page with the click of a button!

Sometimes things change and getting the coverage I need takes me away from more important tasks.

Build rules to allow employees to drop shifts or trade shifts (pending approval), so decisions can be made more quickly when things change.

A few minutes here and a few minutes there can add up and cost me a lot in unplanned labor.

Build rules to restrict or alert you to punches outside of scheduled times, giving you full control of your labor cost.

NETSCHEDULER

Never run into scheduling problems again. Put time on your schedule to contact us about adding NetScheduler to your HR tool kit.
